DETAILED ACTION

Claims 1-20 are pending in the application.

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-12) in the reply filed on 7/29/04 is acknowledged.

Abstract

The abstract of the disclosure is objected to because of undue length. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts for compounds or compositions, the general nature of the compound or composition should be given as well as its use, e.g., "The compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class. For processes, the type reaction, reagents and process conditions should be stated, generally illustrated by a single example unless variations are necessary.

Complete revision of the content of the abstract is required on a separate sheet.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite "a carboxylate (CO₂H)". However, a carboxylate is CO₂⁻ group while CO₂H is a carboxyl group. Clarification and/or correction is requested.

The word "comprising" renders the claims indefinite. It is not clear whether the claims are directed to a compound or a composition.

Allowable Subject Matter

Claims 1-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The tetraazacyclododecane ligand of general formula I according to claim 1:

wherein all variables are as defined in the claims were neither found to be obvious nor anticipated by the prior art of record.

Prior art does not teach or suggest the presently claim magnetic resonance contrast agent of general formula II.

II

that enhances magnetic resonance imaging (MRI) contrast with the desired τ_M value.
